

EQUINOX

...data to decisions...

Plant MES Services

Please pick your choice, by clicking on the appropriate square. And you can even select the application software of your choice!!

◆ **Plant Historian**

Equinox offers expertise in multiple Historians. Having implemented InfoPlus.21, PHD, PI, Exaquantum, Wonderware historians in a wide range of process plants, Equinox brings proven track record of implementation, training, support and maintenance services

◆ **Data Reconciliation**

We implement various Data Reconciliation (DR) tools such as Sigmafine, Aspen Operations Reconciliation and Accounting (AORA), Production Balance etc. depending on Client's requirement.

◆ **KPI Dashboards**

Whatever Key Performance Indicator you may have, Equinox has expertise and proven track record in developing & implementing smart and innovative presentation of KPI's on various platforms.

◆ **MES and ERP Integration**

Data Centralization is the key requirement for all the industries in the current automation world. We help you integrate data historians, Reconciliation & Planning tools with any ERPs such as MS Dynamics, SAP, JDE etc.

◆ **MES for Batch Plants**

Batch plants present a different set of challenges to the plant owners and operators. Often people struggle to get consistent quality across the batches! A good MES system simplifies batch monitoring and analysis to help you produce batches with consistent quality.

◆ **MES-LIMS Integration**

Often Quality Test data from the Lab, needs to be accessed across almost all the departments for the daily analysis and monitoring. Equinox offers expertise in integrating your Lab data with the Plant data, to view a consolidated picture of your process.

In case you have any other requirement, please write to us with your problem definition.
